

PharmWaste Transit Management System

Scan, sort and ship pharmwaste per Department Of Transportation regulations online, with ease. You select the bin colors and the BMP waste parameters. An output clearly indicates what color bin to sort your pharmwaste for transport. A concise inventory is generated and archived for tracking purposes.

Features

- Internet based application – no capital equipment to purchase or lease
- User customized BMP Parameters
- User customized bin colors
- Color coded onscreen output
- 300,000 + records in master database – including drugs and devices
- Identifies recyclable and universal wastes
- Inventory Tracking Reports
 - Print Online
 - Save to spreadsheet
 - Auto archived online for later recall
- Input product by scanning UPC, entering NDC or product name
- Select from more than ten of the most common pharmwaste DOT shipping descriptions
- Free with a Waste-ID subscription

About PharmWaste Technologies

PTI assists healthcare facilities with the proper identification and management of pharmaceutical waste streams through extensive industry experience and innovation software.

PTI is a member of Practice Greenhealth and The Product Stewardship Institute. PTI is also endorsed by several healthcare group purchasing organizations.
