PTI Introduces an Online Return Goods Policy Database

URBANDALE, IA (January 30, 2009) PharmWaste Technologies Inc. (PTI), today announced the introduction of a Returns Policy section to their website.

PTI's online Return Goods Policy section allows their customers the ability to look up the manufacturer's specific returns policy by inputting the NDC number, scanning by UPC or conducting a product search by name.

"The addition of this new feature was created to assist our customers in determining which pharmaceuticals were returnable for credit" said Jeff Hollar, President of PharmWaste Technologies. "Some regulators are wanting the pharmaceutical waste generator to manually pour over past garbage reports from their reverse distributor to see which products have a tendency to be hazardous waste. The goal is a system that prevents the pharmacy from using the Reverse Distributors as a waste management tool. PTI's new website feature allows the pharmacy to do this in the most efficient manner possible." says Hollar.

About PharmWaste Technologies - PharmWaste Technologies Inc. is an industry leader in providing solutions surrounding the complex area of pharmaceutical waste through a combination of industry experience and innovative software. For more information call (515)276-5302 or email info@pwaste.com.
