**PTI Introduces Waste Identification Software for the Healthcare Industry**

URBANDALE, IA (November 10, 2007) PharmWaste Technologies Inc. (PTI), today announced the introduction of their highly anticipated Waste-ID Software™, a new software package aimed at assisting pharmacies in determining which products in their inventory are considered hazardous by RCRA (Resource Conservation & Recovery Act) and BMP (Best Management Practices).

Waste-ID Software™ is a cutting edge software package that is locally run on your pharmacy's computer. It allows the user to select from a variety of industry guidelines. The result is an output customized to your pharmacy's particular situation. Software and database updates are easily assessable online.

"This software is a must for any hospital pharmacy." said Jeff Hollar, President of PharmWaste Technologies. "Federal and state regulators have been clamping down on pharmaceutical hazardous waste generation. The first step in compliance is to go through your pharmacy's inventory and figure out which products are hazardous when wasted. This software accomplishes that, and more." says Hollar.

About PharmWaste Technologies - PharmWaste Technologies Inc. is an industry leader in providing solutions surrounding the complex area of pharmaceutical waste through a combination of industry experience and innovative software. Target customers include pharmacies worldwide. For more information call (515)276-5302 or email info@pwaste.com.
